

FLAME RETARDANT BLEND CONTAINING
MONOMERIC AND OLIGOMERIC FLAME RETARDANTS

Abstract of the Disclosure

5

A flame retardant blend is disclosed that comprises: (a) a monomeric halogenated organic flame retardant that is adapted for use in a polyurethane foam formulation; and (b) an oligomeric organophosphate flame retardant having a
10 phosphorus content of no less than about 10%, by weight, and at least three phosphate ester units therein, the amount of (a) in the blend being no less than the amount of (b). It is useful in polyurethane foams.
